Subject: RE: aldicarb memo for your review

Thanks for the background and noting the reviews by OGC and contributions to developing the methodology. Not having seen earlier versions or the comments from Angela, I hope I haven't set the team back with some of my comments. I know RD is anxious to get this document, so maybe sharing a version soon, even if there are still some of our comments being considered, makes sense. I am open to options.

I took a quick look at your comments. Just wanted to let you know that Angela (OGC) thoroughly reviewed this memo (twice). She helped develop the methodology with SIAB. I am sure Mark will share more on this. Some of your comments are related to language developed by Angela and the team. I have also reviewed very few of PCTn documents as they did not typically come to BAB for help/review in the past so my history is limited. I'm sure the team will find your comments helpful. Thanks.

Hi everyone. I also looked at the memo and thought you all did a very thorough job with it. Nice work. Some of my questions are based on my not reviewing one of these memos before and not entirely familiar with the approach to the analysis. Let me know if you have any questions about any of my comments which can be found in the file on the One Drive.

Thanks,
Neil

Subject: aldicarb memo for your review

Hi Kimberly,

The aldicarb team respectfully submits our percent crop treated for new use (PCTn) memo for your review. A link to the most recent draft is attached. It has gone through PRP, BC and OGC review with authors responding to comments after each phase.

We understand that you are very busy and thank you in advance for your time in reviewing our work. The document is past due in RD, unfortunately. However, we plan to let them know today that it is now in DD review!

Sincerely,
Rebecca
